### OLLI EVENTS

All in-person events and trips are cancelled for the summer. However, some events may be delivered via Zoom. Watch OLLI newsletters for event announcements.

### OTHER ACTIVITIES

All committee meetings will be held via Zoom.
Guidelines for Zoom Videoconferencing
OLLI uses the Zoom app to deliver online courses, committee meetings and events as an in-person alternative. Each course, meeting or event has a Zoom link to join it. For recurring classes, each time the class meets, you’ll use the same link. The links for each week’s classes are provided in OLLI’s weekly online newsletter, and the links for all summer courses are provided on the OLLI website (you’ll need your CSUF username and password). Click on the link to join the meeting.

A Zoom account isn’t required to attend a class meeting. Anyone can attend a class meeting using their laptop or desktop (Windows or Mac), tablet or smartphone (iPhone or Android). However, be sure to use your full name when signing in to Zoom to facilitate taking attendance. If you haven’t used Zoom before, leave about 5 minutes to set it up before your first use. If you are planning on using a laptop or desktop, the first time you click on a link, it will download a free and secure Zoom app on your computer. If you are planning on using a tablet or smartphone, you’ll want to download the free and secure Zoom app (“Zoom Cloud Meetings”) from your app store.

Summer Program Schedules
Cancelled programs are not shown below, only programs in the summer Blue Book that are not cancelled and new programs. The scheduled meeting days, dates and times for almost all programs are unchanged from those shown in the summer Blue Book. Those that are changed are shown in red. Full course descriptions are shown only for new courses added to the summer curriculum (not shown in the Blue Book) or for courses with revised descriptions. To see full course descriptions, refer to the summer Blue Book or the OLLI website.

Big Data and Its Impact on Society (New)

Alternate Thursdays • 10 a.m.-11:30 a.m.
June 4, 18 • July 2, 16, 30 • August 6
You have heard that data is our future. Well, the future is here. Data is impacting our lives today. It is impacting our fight against the current pandemic. It is shaping the way we live our lives. It affects education (“no more papers, no more books, no more teacher’s dirty looks”),
communications, business, travel, how we shop and eat, the weather, politics and even religion. We will use big data today and tomorrow. The alternative is to just sit back and wait for someone else to decide everything for us! The course will use videos, lectures and lots of discussion.

**Instructor/Coordinator:** Gene Brown

*June 4, 11, 18, 25 • July 2, 9, 16, 23, 30 • August 6*

This is an interactive course using the National Geographic Brain Games series which explores cognitive science through focusing on illusions, psychological experiments and counterintuitive thinking. Come have some fun as each of these programs unlocks the science behind the mysteries of why we say, eat, feel and act as we do. Episodes will cover topics ranging from memory and common sense to morality and the paranormal. These series of interactive experiments are designed to mess with your mind by revealing the inner-workings of your brain. This is a fun way to learn about the science of how our brain reacts and interprets the world we live in.
