- Add background music
- Export your movies and share them with others
- Most of all you will get ideas on how to make movies that other people will enjoy

lynda.com tutorial **iMovie 10.1.1 Essential Training** by Garrick Chow

This tutorial will be used in the course and is recommended for class follow up.

On each computer in the class there are many video files and photos for you to use to build your movie projects. We hope to have enough time at the end of the course for you to start on movies with your own clips.
