Extra  
monitor  
with laptop

# Bigger Print

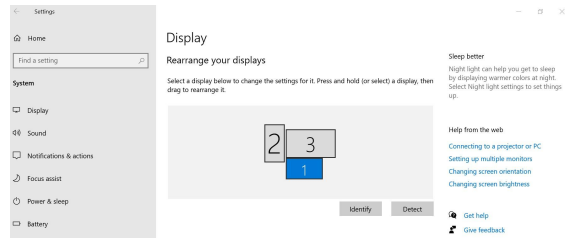

Ctrl +, Ctrl -, Ctrl 0 for PC  
Command +, Command -, Command 0 for Mac

# Display contrast

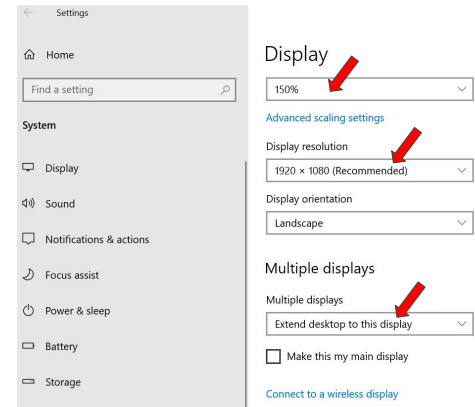

A lot of the web is using dark gray print on a light gray background that I find hard to read. This chrome extension helps me for most web pages. It breaks some web pages and need to be turned off.

# PC display settings

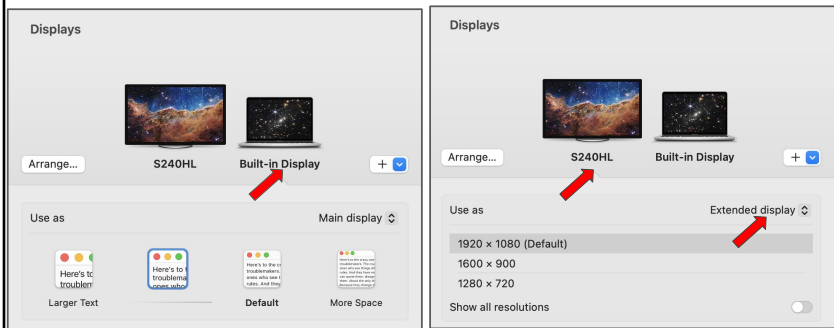

On a pc right click on empty desktop and choose “Display Settings”

# PC display settings

Scroll down to get other settings

# Mac: System Preferences > Displays

Text size, extended display and screen resolution

# Cables to connect an external monitor

## Different kinds of display connections

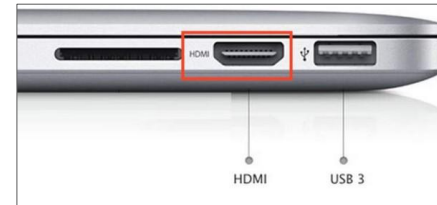

Display Port

VGA

DVI

HDMI

## HDMI

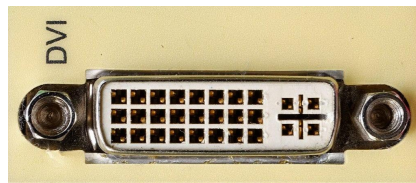

HDMI

USB 3

## DVI

## VGA

## DisplayPort

## Thunderbolt 1 & 2 / Mini Display Port

## Thunderbolt 3 (a special kind of USB-C)

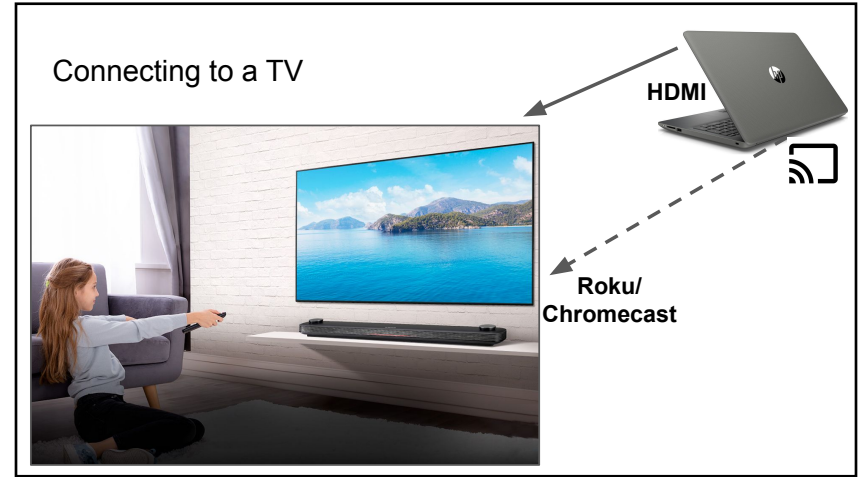

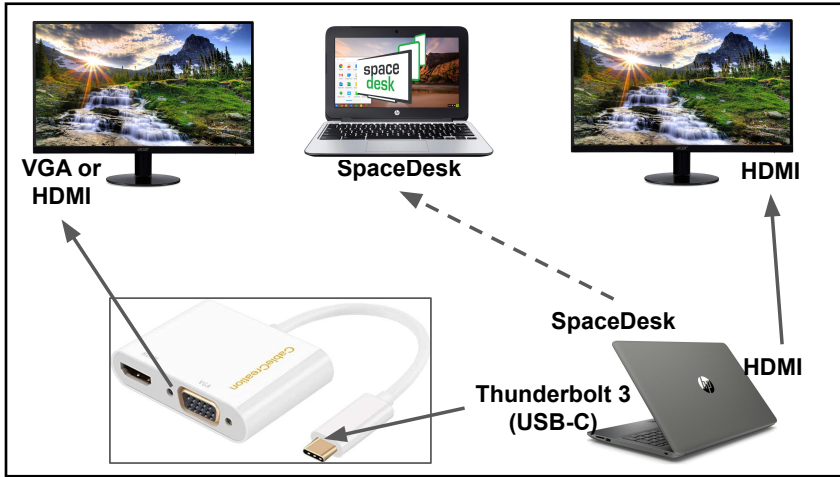

## Software Solutions
