---

## Passwords App

- ◆ Created for iOS 18
- ◆ Based upon Apple's Keychain process
- ◆ Keeps Passwords, Passkeys, Authentication Codes, WiFi passwords
- ◆ Synchronized to all Apple devices plus a Chrome extension and Windows plug in

4

---

---

---

---

---

---

---

---

## Passwords App

- ◆ Password Mangers have been around for a while
- ◆ They are underutilized - Why?
  - ◆ Users not familiar with them
  - ◆ Lack of trust

5

---

---

---

---

---

---

---

---

## Passwords App

- ◆ Turn it on by device
  - ◆ Settings > "name" > iCloud > Passwords
    - ◆ Sync this iPad {iPhone, Mac}

6

---

---

---

---

---

---

---

---

# Passwords App

## ◆ Sections

- ◆ All
- ◆ Passkeys
- ◆ Codes (Authentications)
- ◆ WiFi
- ◆ Security

7

---

---

---

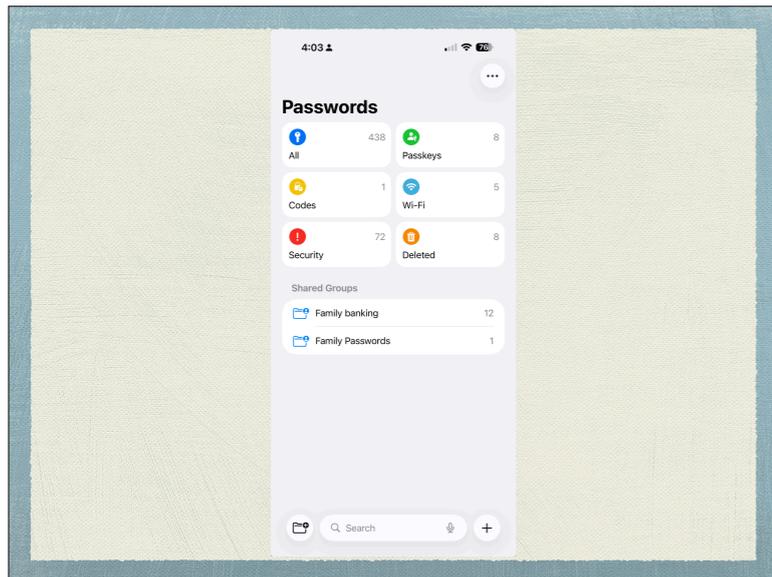

---

---

---

---

---

8

---

---

---

---

---

---

---

---

# Passwords App

## ◆ To find passwords

- ◆ Search window
- ◆ Alphabetical list in selected group

9

---

---

---

---

---

---

---

---

## Passwords App

- ◆ Adding passwords
  - ◆ Example - Computer cable store

10

---

---

---

---

---

---

---

---

## Passkeys

- ◆ Replaces passwords with passkeys
- ◆ Replaces what you know with who you are
  - ◆ Your devices vouch for you
    - ◆ Face ID, Touch ID or Passcode
- ◆ Adoption by website is slow

11

---

---

---

---

---

---

---

---

## Passkeys

- ◆ Setting them up
  - ◆ <https://passkeys.directory>
- ◆ Apple support: <https://youtu.be/1WrogLzTK1k?si=IihxFQoOmAzMWD3>

12

---

---

---

---

---

---

---

---

## Codes (Authenticators)

- ◆ Google Authenticator
- ◆ Microsoft Authenticator
- ◆ Duo Mobile

13

---

---

---

---

---

---

---

---

## WiFi

- ◆ Easy way to share your WiFi Password
  - ◆ Show Network QR Code
    - ◆ The user who want to join you WiFi
      - ◆ Will open their camera and scans the QR code
  - ◆ Print the QR code and frame it on the wall

14

---

---

---

---

---

---

---

---

## Security

- ◆ Shows your potential issues with your passwords

15

---

---

---

---

---

---

---

---

16

---

---

---

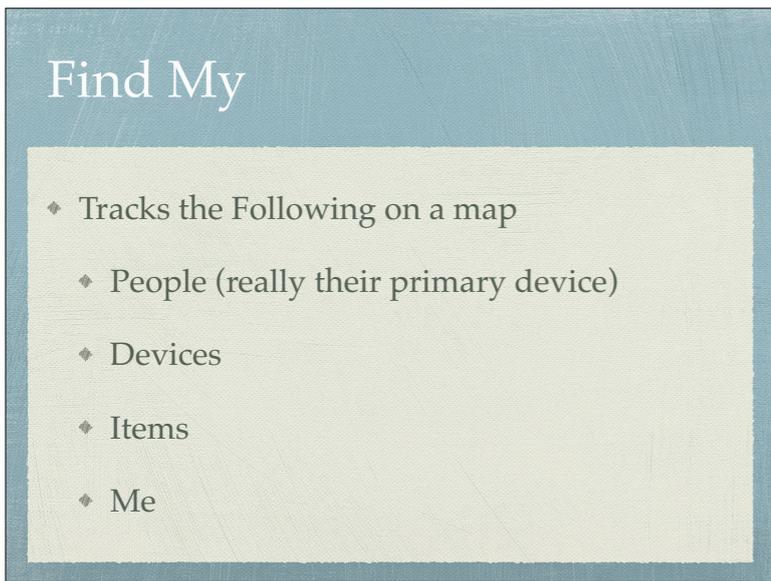

---

---

---

---

---

17

- ◆ Tracks the Following on a map
  - ◆ People (really their primary device)
  - ◆ Devices
  - ◆ Items
  - ◆ Me

---

---

---

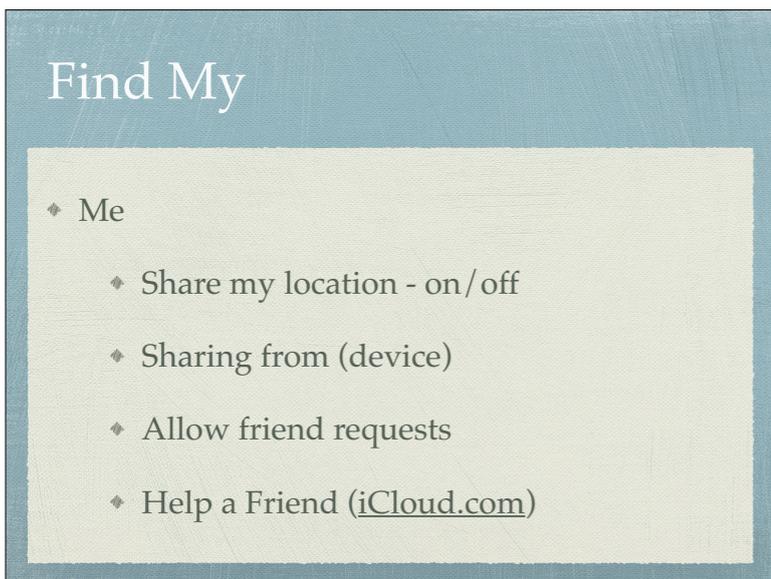

---

---

---

---

---

18

- ◆ Me
  - ◆ Share my location - on/off
  - ◆ Sharing from (device)
  - ◆ Allow friend requests
  - ◆ Help a Friend ([iCloud.com](https://www.icloud.com))

---

---

---

---

---

---

---

---

# Find My

## ◆ People

### ◆ Can add people

- ◆ You request tracking and they must allow for 1 hr, end of day or indefinitely

19

---

---

---

---

---

---

---

---

# Find My

## ◆ Devices

### ◆ List of all your Apple Devices

### ◆ Pick one

- ◆ Shows device on a map
- ◆ Play sound
- ◆ Directions
- ◆ Lost mode Can lock and give a message you create
- ◆ Notify when found
  - ◆ Notifies you when your phone is on

20

---

---

---

---

---

---

---

---

# Find My

## ◆ Items

### ◆ List of all your Apple Air Tags and find my enabled items

- ◆ Shows the device on a map
- ◆ Play sound
- ◆ Find Nearby
- ◆ Share AirTag
- ◆ Lost AirTag
  - ◆ Show contact info
  - ◆ Share item location
- ◆ Notify when found on / off
- ◆ Notify when left behind
  - ◆ Can exclude safe places (i.e. home)

21

---

---

---

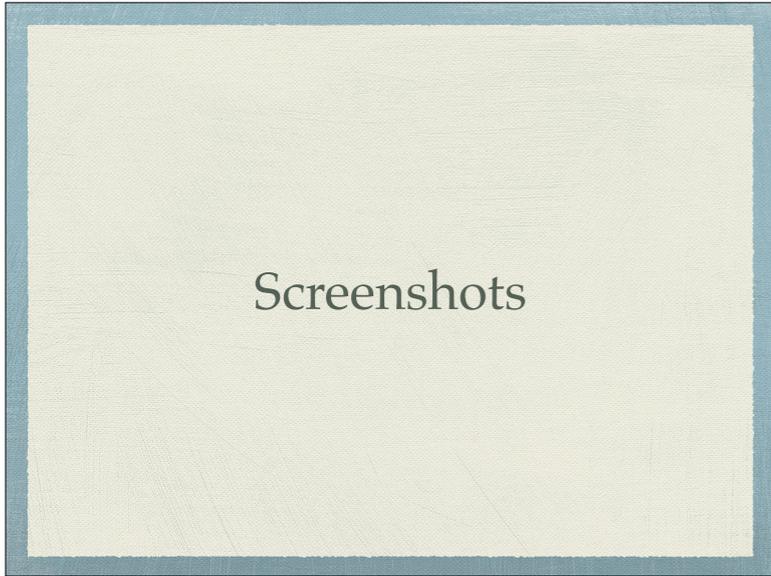

---

---

---

---

---

22

---

---

---

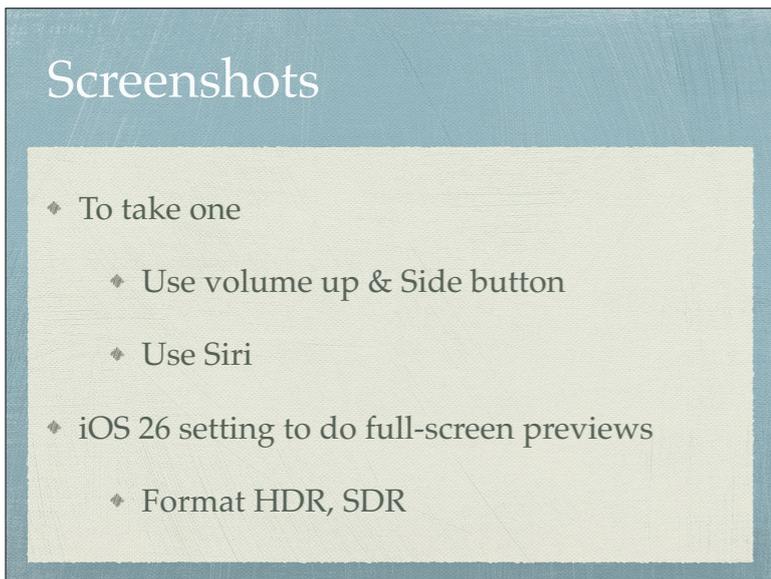

---

---

---

---

---

23

## Screenshots

- ◆ To take one
  - ◆ Use volume up & Side button
  - ◆ Use Siri
- ◆ iOS 26 setting to do full-screen previews
  - ◆ Format HDR, SDR

---

---

---

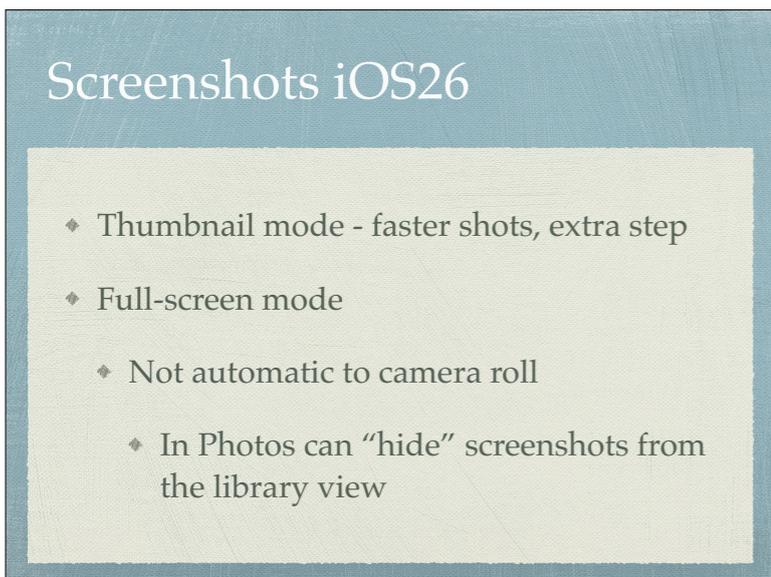

---

---

---

---

---

24

## Screenshots iOS26

- ◆ Thumbnail mode - faster shots, extra step
- ◆ Full-screen mode
  - ◆ Not automatic to camera roll
    - ◆ In Photos can "hide" screenshots from the library view

---

---

---

---

---

---

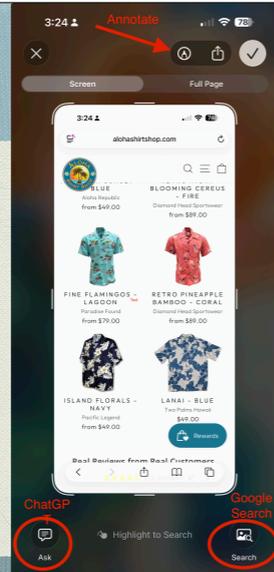

---

---

# Screenshot iOS 26

- ◆ Annotate/Markup
- ◆ ChatGPT inquiry
- ◆ Google Search

28

---

---

---

---

---

---

---

---

---

---

# Apple Intelligence

29

---

---

---

---

---

---

---

---

---

---

# Apple Intelligence

- ◆ Is not a Chatbot
- ◆ Is not intended to compete with ChatGPT and others
- ◆ It is more limited and rolled out for specific instances
- ◆ Is **entirely done on your device** unless you ask it to use ChatGPT
  - ◆ Tell Siri to "Ask ChatCPT" in your prompt (must have turned it on in settings)
  - ◆ If you ask Siri a complex question it may ask if you want it to forward it to ChatGPT
- ◆ Apple Intelligence is stated to be security oriented by not sharing your information, even with Apple. (Unless it is referred to ChatGPS)
  - ◆ This limits its power and scope

30

---

---

---

---

---

---

---

---

---

---

# Apple Intelligence

- ◆ AI as done by OpenAi, Microsoft, Google, Amazon etc
  - ◆ Use very, very large scale data centers
  - ◆ Uses huge amounts of electricity
  - ◆ When information goes to them to process is it safe?
- ◆ Apple is scaling it down to run on your devices
  - ◆ Will this work? Is it better or even practical?

31

---

---

---

---

---

---

---

---

# Apple Intelligence

- ◆ Is not strictly an iOS 26 feature
- ◆ Much was Promised for iOS 18 but features were slow to come out
- ◆ What can your device can do?
  - ◆ It depends on your device
    - ◆ How new & how powerful determines what it can or can not do

32

---

---

---

---

---

---

---

---

# Apple Intelligence - iOS 18.1

- ◆ Writing tools
- ◆ Clean up in Photos
- ◆ Natural language search in Photos
- ◆ Notification, mail & message summaries
- ◆ Better Siri
- ◆ Priority messages in Mail

33

---

---

---

---

---

---

---

---

## Apple Intelligence - iOS 18.2

- ◆ ChatGPT in Siri
- ◆ Genmoji
- ◆ Image Playground

34

## Apple Intelligence - iOS 26

- ◆ Live Translations
  - ◆ Messages/Facetime/Phone
  - ◆ [Apple Live Translation video](#)
- ◆ Visual Intelligence improvements
- ◆ Image Playground - Added ChatGPT
- ◆ Privacy
  - ◆ Private Cloud Compute (Not sure this has started)
    - ◆ Goes to apple servers and Apple says "we won't look"
    - ◆ Inquiries never stored or shared

35

## Apple Intelligence

- ◆ So far Apple releases are specific actions connected from apps and the OS
  - ◆ Even the use of ChatGPT is not full chatbot, but Siri with ChatGPT is closer
- Demo Death Valley itinerary
- ◆ Can use a browser or AI app such as ChatGPT, Gemini etc to do open chatting

36

# Apple Intelligence

- ◆ Lets Demo examples
  - ◆ Writing tools - (pages Wupatki)
  - ◆ Clean up in Photos - (Photos remove aircraft)
  - ◆ Natural language search in Photos
  - ◆ Notification, mail & message summaries
  - ◆ Priority messages in Mail

37

---

---

---

---

---

---

---

---

# Apple Intelligence

- ◆ Lets Demo examples
  - ◆ Genmoji
  - ◆ Image Playground
  - ◆ Visual Intelligence improvements - (spider)
