Slide 1

iPhone/iPad Essential Training
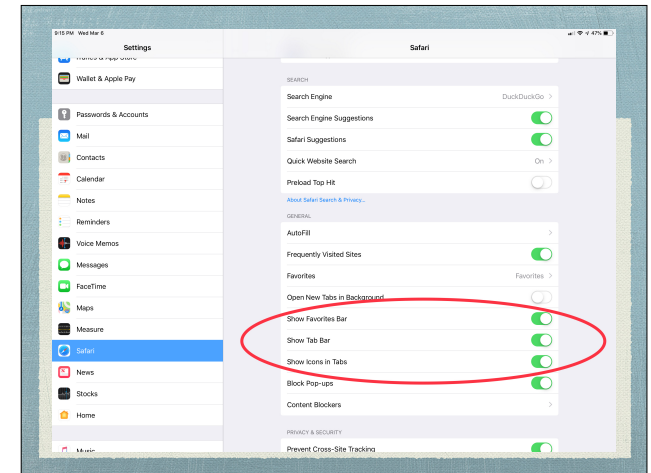

Bob Newcomb

Browsing the web
via Safari
October 21, 2021

Slide 2-1

Basic Layout

- iPad has much more space to show things
  - Favorites, tabs and navigation is on the top of the screen
    - **Settings ➜ Safari**

Slide 2-2

(Safari settings screen showing Show Favorites Bar, Show Tab Bar, Show Icons in Tabs circled in red)

Slide 2-3

(Safari settings screen showing TABS section with Separate Tab Bar and Compact Tab Bar highlighted in red)
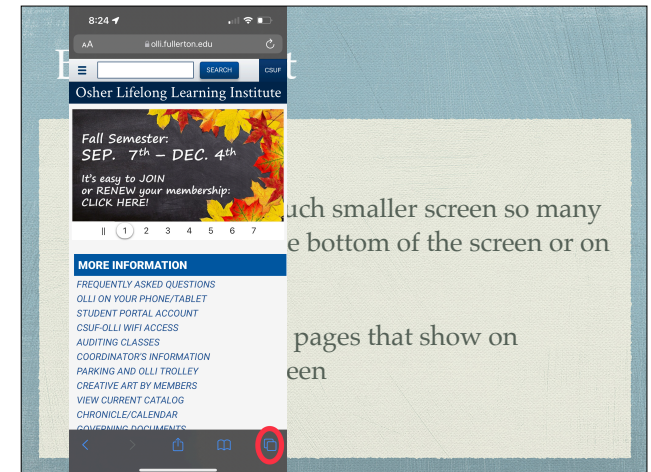

Slide 3-1

Basic Layout

- iPhone has a much smaller screen so many things are on the bottom of the screen or on another screen
  - i.e. tabs are pages that show on another screen

Slide 3-2

(iPhone Safari screen showing Osher Lifelong Learning Institute page)

---

iPad OS 13 - iPad

- By default starting with iPad OS 13, it tells the website you are using MacOS

  - This means you get the desktop version of the site, not the mobile version

- On iOS 12 or earlier the website might give you the mobile version.

  - Tap on the ᴀA icon to have the option to **request** the Desktop or Mobile Version

4

Settings by website

- Added in iOS 13

- Tap ᴀA icon & select Website settings

5-1

Settings

- Added in iO

- Tap ᴀA icon   settings

5-2

Address/Search Bar

- They are combined!

- As an Address bar

  - go directly to websites

- As a search bar

  - uses search engine (Google, Yahoo, Bing or DuckDuckGo)

    - Set in Setting > Safari

- Is the address filled in and highlighted in blue?
  - Accept it with return or keep type to replace it
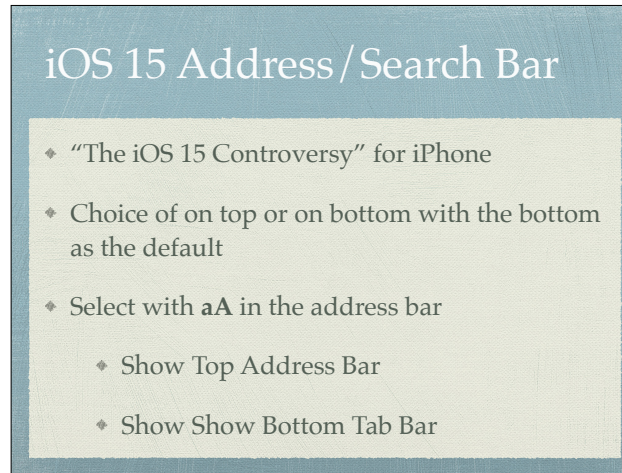

6

---

  - Touch and hold the URL

8

Moving around

- Scroll down

- **Return to top of page**

  - **Tap top of screen twice**

9

Slide 10

Background vs Tabs/Pages

- Background web pages
  - sequential history where you can go back and forth
    - < or >
- Tabs (or Pages) open a new tab where you can still have background web pages
- iOS 15 tab groups

Slide 11

Tabs on iPad

- Create a new Tab
  - +
  - Or long press a link to open menu of options including Open in New Tab
- Navigating tabs
  - Tap ⧉ icon and select tab
- Deleting Tabs
  - Tap and Hold ⧉ icon and select choice of options

Slide 12

Pages on iPhone

- Add a Page
  - Pages icon ⧉
  - +
  - Or long press a link and choose **Open in a New Tab**
- Navigating and deleting Pages
  - **Delete all tabs or Pages**. Tap and hold tab or pages icon

## Slide 13

Reader Mode

- Shows only the good stuff in an article
  - On iOS 13 and newer tap the Aa icon and tap Show Reader View
  - On older iOS, look for the 3 ½ lines at the left of the address bar
    - tap it to turn on reader.
    - tap it to turn off reader
- Persistent Reader View
  - Tap Icon and select this website
 - For all websites **Settings > Safari > Reader** and turn on Other Websites

iOS 12 & earlier
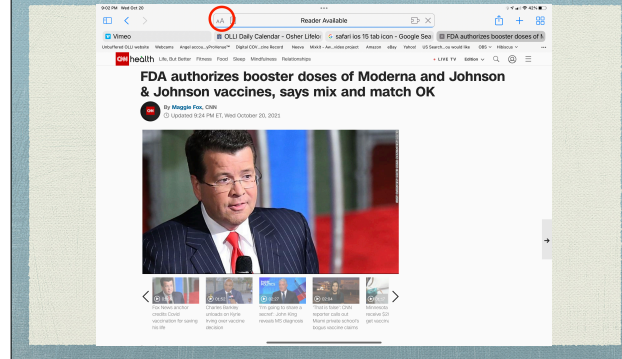

Slide 15

iOS 12 & earlier

iOS 12 & earlier

16

iOS 15

17-1

iOS 15

17-2

Bookmarks

- Create them with Share icon
  - "Regular"
  - **Favorites**
    - **Arrange and delete them (2 ways)**
- Go to them with Bookmark icon
  - press on it to make bookmarks appear and again to make it disappear
 - bookmark column is on the left

18

Reading List

- Alternative to Bookmarking
- Saves web page for off line reading
  - Go to **Settings ➔ Safari**
    - (Reading List) **Automatically Save Offline**
- Save with Share icon/Add to Reading List
- View from Bookmarks, Reading list is the middle column (Harry Potter glasses)
- Unread or All view

19

## History

- Click on the clock icon on the right
  - This keeps a long history of your web page activity and searches
 - **Clear** deletes history, searches and cookies

20-1

20-2

20-3

Safari Settings

- Passwords
  - **Settings ➜ Passwords & Accounts**
- **Settings ➜ Safari**
  - **Search Engine choice**
    - Google, Bing, Yahoo & DuckDuckGo
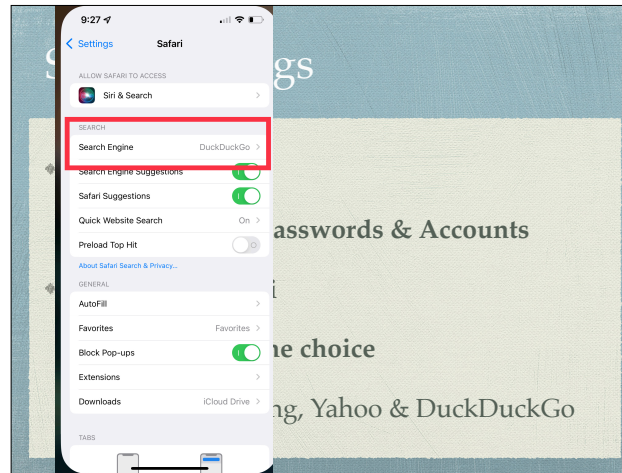

21-1

21-2

21-3

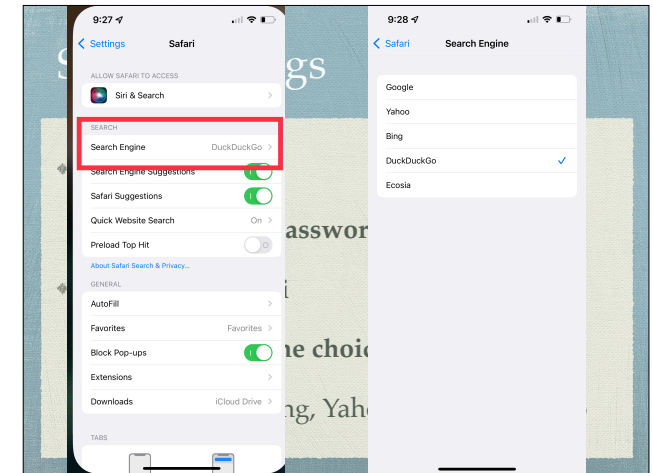

21-4

Safari Settings

- Passwords
  - **Settings ➜ Passwords & Accounts**
- **Settings ➜ Safari**
  - **Search Engine choice**
    - Google, Bing, Yahoo & DuckDuckGo

21-5

21-6

21-7

Safari Settings

- **Settings ➜ Safari**
  - Block Cookies
  - Clear History and Website Data (cookies)
  - look under **Advanced > Website Data** to see what sites have saved a cookie

22

iCloud tabs

- Macs, iPhone and iPads
- In Settings/iCloud Safari must be turned on, on all devices
- If the tab is left in Safari on one device the tab is available to the other devices

23

Form Auto-fill

- **Settings ➜ Safari ➜ AutoFill**
- Optionally keeps
  - your contact info
  - credit cards
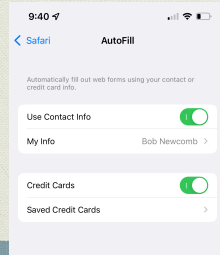

24-1

Form Auto-fill

- **Settings ➜ Safari ➜ AutoFill**

- Optionally keeps

    - your contact info

    - credit cards

24-2

Passwords

- **Settings ➜ Passwords ➜ Accounts & App & Website Passwords**

- Your Passcode is needed to see the passwords

- Can be used to "remember" forgotten passwords

- (Here is another reason not to share your device's passcode)

25

Keychain

- Keeps passwords for web sites (since iOS 11, also for apps)

- **Settings ➜ iCloud ➜ Keychain** and turn it on

26

tidbits

- **Find on Page**

    - In Share icon selections, choose Find on Page

- **Save a webpage to a home screen**

    - In Share icon selections, choose Add to Home Page

27

tidbits

- **Lookup button** (Spotlight Search

    - Select a word (or more) and tap lookup in the bar above the selection

- **Save webpage as a PDF**

    - Tap Share icon

        - Tap Print icon

        - Pinch out. This creates the PDF, then share that with the app you want to keep the PDF

            - With iOS 13 can save the whole page not just what is on the screen

28
