15

# iCloud +

- ◆ iCloud Private Relay
  - ◆ Normally your DNS info and IP address is seen by your ISP (internet service provider) and the website you visit
  - ◆ With Private Relay
    - ◆ Your ISP sees you connect to Apple and of course they know your IP address
    - ◆ The visited website knows you came from Apple but not your IP address
    - ◆ Neither can see what you are sending and receiving
    - ◆ You may have some activity denied by the network you are on
      - ◆ Can turn off Private Relay in Control Center
      - ◆ Can turn off Private Relay for specific networks in Settings > WiFi>, tap the  button and turn off iCloud Privacy Relay

16

# Find My

- ◆ Your iPhone is trackable for 24 hours after it is shut down.
